Summary:

Motivated and results-driven professional with a strong educational background in Information Technology. Skilled in web development, programming languages, and design, I am seeking opportunities in the tech industry to contribute my knowledge and expertise in driving organisational success. With a proven track record in project-based learning and practical application of programming concepts, I bring a combination of technical proficiency, critical thinking, problem-solving abilities, and a dedication to delivering high-quality results.

Educational Achievements:

Bachelor of Art in Publishing Studies, Kwame Nkrumah University of Science and Technology (KNUST), 2022

- Relevant coursework: Programming Languages, Web Development, Designing
- Capstone project: Child Safety: Emergency Preparedness and Situational Awareness.
 - Worked as developer in a four-member team to build a child safety app using React.
 - Designed and implemented key features, such as emergency contact integration.
 - Received an "A" grade for outstanding contributions to the project.

Certification in Javascript Programming Foundations, Udacity, 2022

- Completed a comprehensive program covering the fundamentals of Javascript programming, including closures, object-oriented programming, and DOM manipulation.
- Relevant to my career goals in Web Development as proficiency in Javascript is essential for developing dynamic and interactive web applications

Certification in Web Development Foundations, Udacity 2022

- Completed a comprehensive program covering the fundamentals of web development, including HTML, CSS, and responsive design principles.

- Relevant to my career goals in Web Development as it provided a solid foundation for creating engaging and user-friendly web applications.

Certification in Programming for Everybody, Coursera

- Completed an online course covering the basics of programming using Python
- Learned key programming concepts and techniques, including variables, loops, and functions.
- Relevant to my career goals in Backend Web development, as it provided a foundation for building robust and scalable web solutions and for further studies in computer science and programming.

Certification in Fullstack Web Development (Self-Study), Udacity 2022

- Undertook an extensive self-study program in Fullstack Web Development, focusing on key technologies including HTML, CSS, JavaScript, API, and SQL.
- Gained practical experience and acquired a solid foundation in building dynamic websites, creating responsive user interfaces, and integrating backend functionalities.
- Demonstrated a strong commitment to continuous learning and self-improvement in the field of Full Stack Web development, enhancing my skills and knowledge to meet industry demands.

Technical Skills:

- Proficient in various operating systems, including Kali Linux, Opensuse, and Windows 8, 10 and 11, with a demonstrated ability to navigate and troubleshoot these systems effectively.
- Skilled in programming languages, including HTML, CSS, Python, JavaScript, and C, with experience developing applications, scripts, and websites using these languages.
- Proficient in design tools such as Figma and Adobe Illustrator, with a demonstrated ability to create high-quality designs for websites, applications, and other digital media.
- Experienced in cloud computing, particularly with Amazon Web Services (AWS), with a demonstrated ability to set up and manage cloud infrastructure, deploy applications, and data storage.

Soft Skills:

- Problem-solving
- Critical thinking
- Teamwork
- Attention to detail
- Time management
- Leadership skills
